PROFESSIONAL SUMMARY

Azure Data Engineer with 4+ years of enterprise experience architecting scalable cloud data platforms using Microsoft Fabric, Azure Data Factory, Azure Databricks, Azure Synapse Analytics, and Power BI. Proven expertise in lakehouse architecture, complex ETL/ELT pipeline development, data modeling, and query optimization. Adept at driving legacy migrations and building robust integration layers that enable reliable, high-performance analytics across CRM, ERP, and cloud-based enterprise ecosystems.

CORE SKILLS

Cloud & Data Platforms: Microsoft Fabric, Azure Databricks, Azure Data Factory, Azure Synapse Analytics, Copilot Studio for Agentic AI

Data Engineering & Integration: Azure Data Factory (ADF), Azure Data Lake Gen2 (ADLS), System Integration (Dynamics CRM, Oracle Fusion, EBS, JDE, SAP, Blue Yonder)

Languages & Processing: PySpark, Python, SQL, KQL

Business Intelligence & AI: Power BI, Microsoft Copilot Studio, Power Apps, Power Automate

Architecture & DevOps: Lakehouse Architecture, Fabric Administration, Fabric Capacity Provisioning, Azure DevOps (CI/CD), Workspace Security (RBAC) & Governance

EXPERIENCE

Senior Consultant Feb 2025 – Present
IT Convergence *Noida, Remote*

- Engineered scalable ETL/ELT lakehouse pipelines processing 2M+ records daily; handled API transient failures using automated retries.
- Administered Microsoft Fabric, resolving cross-tenant deployment bottlenecks via custom PowerShell automation.
- Architected enterprise Power BI semantic models and dashboards, enabling governed self-service analytics for 50+ concurrent users.
- Executed multi-cloud integration strategies using Informatica IDMC, ensuring zero-downtime data warehousing.
- Developed Microsoft Copilot and Fabric AI agents for automated financial reporting and predictive telemetry anomaly detection.

Data Engineer Oct 2021 – Feb 2025
LTIMindtree *Hyderabad, India*

- Orchestrated large-scale Azure Data Factory ETL workflows (500GB/week); prevented data truncation using metadata-driven validation.
- Built ADLS Gen2 data ingestion pipelines to parse multi-GB datasets, handling schema drift through dynamic mapping.
- Developed optimized PySpark processing pipelines in Azure Databricks, cutting heavy transformation times by 30%.
- Tuned complex SQL queries in Azure Synapse Analytics to accelerate enterprise BI reporting across Dynamics CRM data.
- Designed Azure DevOps CI/CD pipelines and automated cross-tenant repository mirroring to drastically reduce manual release cycles.

Software Developer Intern Feb 2021 – Apr 2021
BuzieBrAIns *Bengaluru, India*

- Contributed to the design, development, and QA testing of AIMS (Artificial Intelligence Management System) utilizing SQL, JavaScript, and cloud infrastructure.
- Built and deployed low-code CRM solutions, improving overall implementation efficiency and application reliability for end-users.

PROJECT EXPERIENCE

Diversitech – Enterprise Integration Modernization *March 2026 – Present*

- Engineered a Microsoft Fabric integration layer to replace legacy Informatica ETL, ensuring complete uptime for 2.8M+ daily syncs.
- Built pipelines to extract Oracle EBS and JDE data into Blue Yonder in supported JSON format, utilizing automated scripts to resolve data mismatches.
- Optimized Fabric data transformations to minimize processing latency and ensure high-fidelity synchronization during peak hours and also enabled Event Driven Trigger support.

AOC Analytics – BI Platform Migration *June 2025 – Oct 2025*

- Architected Power BI Dataflows and Semantic Models to optimize ETL ingestion and improve data refresh rates by 25%.
- Directed the seamless migration of 40+ enterprise Qlik dashboards to Power BI without disrupting business continuity.
- Designed interactive, role-based Power BI reports to centralize business logic and enhance executive decision-making.

DataPlexus Solutions – Enterprise Analytics Platform *Feb 2025 – March 2026*

- Extracted heavy ERP data via DataPlexus Connect Framework, automating ingestion into Microsoft Fabric for end-to-end lakehouse analytics and medallion architecture.
- Processed 2M+ daily rows through cross-platform integrations, bypassing source API throttling with efficient event-driven triggers.
- Unified disparate workflows across Fabric, Databricks, and Snowflake to deliver a modernized, scalable analytics architecture.
- Enforced strict enterprise data quality and compliance standards to ensure trusted reporting across the organization.
- IT Convergence - DataPlexus Solutions

CERTIFICATIONS

- Microsoft Certified: Azure Fundamentals (AZ-900)
- Microsoft Certified: Azure Data Fundamentals (DP-900)
- Azure Databricks Platform Architect Accreditation & Azure Databricks Specialist
- Oracle Cloud Infrastructure 2025 Certified Foundations Associate
- Databricks Lakehouse & Generative AI Fundamentals
- AWS Knowledge: Cloud Essentials

AWARDS & RECOGNITION

- IT Convergence: KUDOS Award (2×) for outstanding performance and delivery excellence.
- LTIMindtree: Engineer of the Year Award (2×) for exceptional technical performance and innovation.
- LTIMindtree: Best Performing Team Award for collaborative project delivery excellence.

EDUCATION

BACHELOR'S IN ENGINEERING | COMPUTER ENGINEERING 2017 – 2021
Jaihind College Of Engineering, Kuran CGPA: 8.14

HIGHER SECONDARY EDUCATION | SCIENCE 2016 – 2017
Mahatma Gandhi Junior College, Manchar CGPA: 7.07
